

**Fleur-de-Lis**  
 Livingroom flyer  
 spring 2007  
 Wout Moerman

Use the thinnest possible rubber. I used 0.5 x 1.5 mm but thinner would be better. I also tried a loop cut from a balloon and got a flight of 15 seconds in my living room!  
 Longest flight with Tan rubber:  
 - 35 seconds in my Living room  
 - 45 seconds in large indoor hall
